

# Weekly Meeting notes

## First meeting:

Project: TopReview

Attendees: Kira, Tyler, Alex, Brandon

Date&Time: 4/8; 2:00-3:00 pm

## Agenda:

Main discussion topic: getting ready for week one

- Review of the wireframe, Case diagram.
- The functionality of the webpages.
  - What we would like to work on

## Notes:

Key information so that we can review it later.

- What is meant by the edited reviews and sentiments in the use case diagram?
  - We need to revise the use case diagram. (We should see Gunhi by Wednesday if he doesn't reply sooner.)
- Looking at the APIs for IMBD, Rotten Tomatoes
  - Amazon web services account
  - We need help accessing them
  - <https://www.rogerebert.com/>
  - <https://rapidapi.com/Prastivar/api/metacriticapi>
  - <https://github.com/zkilleb/ebert-api>

## Outcomes:

Key decisions!!

- Change the wireframe and the use case diagram.
- Tyler, Alex, Kira, and Sira will work on the front end.

## Actions:

What will people be working on throughout the week?

- Kira and Sira change the wireframe.
- Gunhi change the Use case Diagram.

- Everyone make sure the Project Guideline is ready to submit
- Kira figure out the linking error in the project board.
- Brandon ask TA/Instructor about APIs we can use.
- Tyler, Alex, Kira, and Sira start on front-end design.
